## SUMMARY

---

Results-oriented Software Developer with three years of experience in web development. Skilled in React.js, Node.js, MySQL, and MongoDB, with expertise in frontend and backend technologies. Proven track record of delivering scalable solutions that meet client requirements and exceed expectations. Effective collaborator with cross-functional teams, adept at problem-solving and meeting project deadlines. Committed to continuous learning and staying updated on industry trends. Passionate about leveraging technology to create intuitive and user-centric web applications.

## EDUCATION

---

**BSc Computer Science** University of Calicut

2016 - 2019

## SKILLS

---

React JS, Redux, JavaScript, Node JS, Express JS, Git, Docker, MySQL, MongoDB  
AWS, EC2, RabbitMQ

## WORK EXPERIENCE

---

### Software Developer

May 2021 - present

Acodez IT Solutions

calicut, kerala

- Developed Plugins for Shopify platform (<https://apps.shopify.com/product-labels-badges>)
- Managed both backend (Sql, node js, express ) and frontend (react js) integration with shopify apis.
- Experience in clean architecture
- Experience in micro-service based applications
- Worked in a service project called Artzage
- Updated old code bases to modern development standards, improving functionality.
- Mentored junior developers to improve their technical skills, fostering a culture of continuous learning within the team.
- Achieved faster development cycles using Agile methodologies, including Scrum or Kanban processes.

### Intern

May 2019 - Jan 2020

Maxlore Innovations LLP

calicut, kerala

- Created and maintained the frontend interface using HTML, CSS, and jQuery to ensure a responsive and user-friendly experience.
- Implemented modern design principles and techniques to enhance the visual appeal and usability of the online hotel booking platform.
- Designed and optimized database schema using Django ORM to efficiently store and retrieve hotel information, user data, and booking records.

# PROJECTS

---

## **Labeler - Product Labels**

[Link to Demo](#)

The app is a powerful tool that enables Shopify store owners to create and manage labels and badges for their products effortlessly. With just a single click, users can highlight all products or specific ones with trending badges. The app provides the flexibility to choose the pages where the badges and labels are displayed, offering a tailored user experience. This application is built using React, Node.js, Express.js, and MySQL, and follows the principles of microservices and clean architecture.

## **Artzage (service Project)**

[Link to Demo](#)

Artzage is an open publishing platform designed for a community bound by love for arts and culture<sup>1</sup>. It provides a space for users to voice their opinions and share their literary content, writing, or artwork on diverse topics of their choice. This platform is built using React.js, Node.js, Express.js, and MongoDB
